

What is Microsoft® HealthVault™?

Microsoft HealthVault is a privacy- and security-enhanced online service that puts you in control of your health information – even in an emergency. At no cost to you, HealthVault lets you access and store health information such as pharmacy, hospital, lab and other medical information so that it's always organized and available to you online. You can also access a range of health and fitness tools and applications, upload data from health and fitness devices, and share health information with your physicians and others you trust.

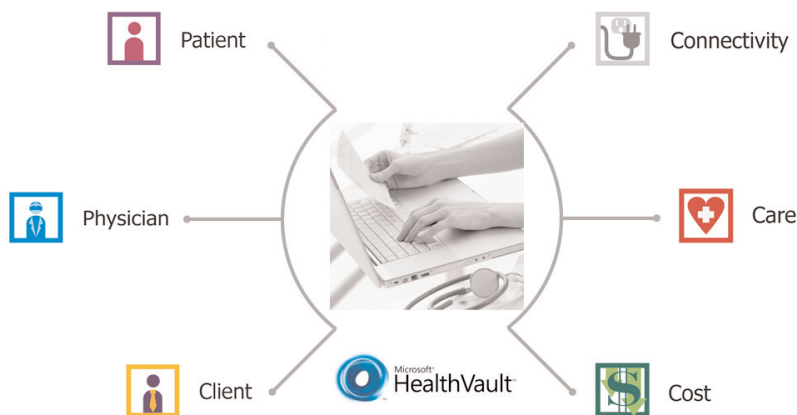

As a HealthVault solution provider, MedImpact gives you the power to access and the option to share your pharmacy data with HealthVault – to make it easier for you to make more informed decisions about your health.

With HealthVault, you:

- Control your Microsoft HealthVault record
- Decide what goes into your record
- Determine who can see and use your information – even in an emergency

HealthVault helps you with:

- **Connectivity** – Single point for your health data access even in an emergency
- **Care** – Organize your health, wellness and fitness information and allow you to share that information with those who contribute and support your good health
- **Cost** – Save money and time while managing your health outcomes

Get Started:

1. Log on to your Member Web Site: <https://www.medicareusa.com/AOPA>
2. Press the 'Copy To' button and authorize the transfer of your processed prescription claims information to your HealthVault account
3. Create and/or log on to your HealthVault account – your processed prescription claims information is now loaded into your HealthVault account
4. On subsequent log ons to your Member Web Site, you will simply press the 'Copy To' button and your new claims information will be sent to HealthVault

Now that you are connected, you and your family members can be secure in knowing that important health information about your medications can be made available to your physicians and your health care team to support your good health.
