Pilots should be prepared to provide their destination/departure airport, estimated UTC time of arrival/departure, UTC date, call sign, and type aircraft. Upon completion of a slot reservation, you will receive a preliminary reservation number. Then between 24 to 8 hours prior to your arrival reservation time you are required to confirm your reservation and will receive a confirmation number. If your reservation is not confirmed at least 8 hours prior to your arrival reservation time it will be CANCELED and AUTOMATICALLY made available into the reservation pool. However, if the reservation is made within 24 hours of the arrival reservation received, it will be AUTOMATICALLY confirmed with a confirmation number.

**The confirmation number SHALL be included in the remarks section of the flight plan.**

Flights unable to arrive within this window, with the exception of delays incurred due to air traffic initiatives, may expect extensive airborne delays or a reroute to their alternate destination unless a revised slot time has been approved by ZDV TMU. Aircraft are expected to arrive within +/- 10 minutes of the assigned reservation time. If a reservation requires change or cancellation, please do so as early as possible in order to release the slot for another flight.

The reservation system will be available 24 hours a day. If you experience difficulty completing a slot reservation, you may contact the Air Traffic Control System Command Center (ATCSCC), Airport Reservation Office (ARO) at (703) 904-4452. **The ARO telephone number is for reservations only, not for information concerning the STMP.** For general information regarding the STMP, please contact Denver Center TMU at 303-651-4202.

Airfiles, change of destination to TEX or from airborne flights to TEX, and flights without a slot reservation confirmation number will not be accepted except for emergency situations while this program is in effect.
