

INSTRUMENT APPROACH PROCEDURE CHARTS

IFR ALTERNATE AIRPORT MINIMUMS

Pilots must review the IFR Alternate Minimums Notes to determine alternate airport suitability.

**⚠️**NA designation on the approach chart means that pilots may not use that approach as an alternate due to unmonitored facility, absence of weather reporting service, or lack of adequate navigation coverage. Approaches with the **⚠️**NA designation are not listed in this section. **⚠️** designation on the approach chart indicates that the approach procedure has non-standard minimums (for aircraft other than helicopters) or restrictions (for all users) for its use as an alternate.

Alternate Minima (ref: 14 CFR 91.169)

|                                        | Precision Approach                                                                                                                            | Non-Precision Approach |
|----------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| Standard                               | 600-2                                                                                                                                         | 800-2                  |
| <b>⚠️</b> Non-Standard or restrictions | As indicated below                                                                                                                            | As indicated below     |
| Helicopters                            | For the selected approach:<br>Ceiling: 200' above published ceiling<br>Visibility: the greater of 1 SM visibility or the published visibility |                        |
| US Military<br>(USA/USN/USAF)          | See Service Regulations                                                                                                                       |                        |

**Note:** For alternate airport flight planning purposes, precision approach operations include: ILS, PAR, and GLS, and Non-Precision approach operations include: NDB, VOR, LOC, TACAN, LDA, SDF, ASR, RNAV (GPS) and RNAV (RNP).
